---

## ***Position Summary:***

The Ultrasound Technologist (sonographer) is a specially trained healthcare professional that works under general supervision and performs diagnostic imaging examinations utilizing sonography techniques specialized for imaging of the body. The Ultrasound Technologist uses their knowledge and skills to perform ultrasound examinations utilizing a technology that creates detailed and dynamic images of the body's internal organs using high frequency sound waves. The Ultrasound Technologist ensures the care provided is safe, appropriate, tailored, timely, and maximizes the potential of the available equipment and resources.
